A SIMPLE SOLUTION TO SOLVE COMPLEX ISSUES

How many times did you face difficulties in managing different types of documents in your company? Thanks to ReCheck you can trust on a software which meets the company needs, not the contrary. ReCheck is a very powerful engine you can customize to process in a fast way a big amount of data and obtain a higher quality of information.

The software interface, easy and essential, shows very well this specialized role:
ReCheck extracts all the items - data and information - from each pdf document and verifies if their position is right, if there are correct, included those coming from sums and multiplications. Is an item in the first page? Is it the same you can find in the final report on the last page? The software does every operation in a very precise and fast way.

DETECTING ERRORS AND IMPROVING PROCESSES

In your company, thanks to ReCheck, the concerned can count immediately on data coming from each processing task. They can realize where the errors are, understand how they have been produced, and solve issues that you can't even detect before. This kind of check can't be executed where there is a manual checking processing, the most common system in use for many companies.

Using a very specialized software like ReCheck lets the organizations not only avoid inaccuracy while managing the information, but also improve the document process management.
Furthermore, you can compare the processed data with those used in other company processes, like the ERP, thanks to the use of the Web Services. Then the concerned can count on precise reports that can be also shared with other colleagues.

EXTRACTING DATA FROM PDF FILES AUTOMATICALLY

The companies have to manage several types of pdf documents, with a fixed or variable structure, like for example forms with standardized fields which are always the same or invoices which can be customized according to the suppliers' needs. ReCheck allows you to manage both situations: you can configure it in accordance with your needs and, from that point on, the software extracts items and checks many types of documents, with the minimal human involvement.

If the company needs to export data from the pdf files to import them into the ERP, ReCheck is the right solution. You select the documents - invoices from suppliers and electric or phone bills - and the system extracts data, checks and transforms them in file (CSV or XML) to import them into the ERP. ReCheck analyzes structured (vector file format) and non-structured documents, and integrates an OCR (Optical Character Recognition) system to inspect the characters.

TECHNICAL FEATURES

Visit the website www.recheck.work to find further technical details about the software.

RECHECK, A SOFTWARE TO PREVENT ERRORS

The software ReCheck extracts and controls data coming from each pdf files, and verifies if each information is correct and in the right place. You don't need any more to export files in Excel format, you can count now on our system which inspects all items in the document and applies all check criteria. If needed, you can also export data and results in CSV and XML.

TRANSFORM COMPLEX CHECK CRITERIA INTO EASY MOVES

Thanks to ReCheck users can execute custom checks on different types of documents with a fixed structure like invoices, bills, pay slips and many more. More complex the documents are, easier the process is: this software verifies everything, so you can forget about the spot checks you were used to do before.

EASY TO USE AND INSTALL

You can easily install ReCheck on your PCs and configure it in a very fast and simple way.
From that point on, you just need few hours of training to get started. Its price?
It depends only on how many documents the company wants to check.

INSERT DATA OF YOUR PDF FILES DIRECTLY IN YOUR ERP

ReCheck allows each organization to replace manual procedures, like data entry in your ERP, with a very efficient automatic system. Users choose the documents in pdf format, the software extracts data and transforms them in files (CSV or XML) to import them in your company processes. In a short time, you can do the work you did before in a week.

## EXTRACT DATA OF YOUR INTEREST QUICKLY

Thanks to ReCheck you can process hundreds or thousands of pdfs with the minimum effort from the user. The software can compare data coming from the documents with those saved in your ERP thanks to some particular communication interfaces (Web Services) you can configure.

A FLEXIBLE SOLUTION

Each company has to check daily several types of documents, the ones produced and those received. ReCheck can deal with both the structured (vector file format) pdfs and scanned documents. The OCR technology of the software then transforms the images of the scanned pdfs into written text.

Easy to install, configure and learn, ReCheck is a prompt solution to process your company documents and apply the defined check criteria in a very **easy and fast way:**

LEARNING CURVE OF THE SOFTWARE
Skills (%) - Time (hours)
